Subject index

Active ingredients solubilization: vitamins; sunscreen oxidants; humectants; phase diagrams; transparent gels, 183
Alternative testing and safety assessment: Shakespeare; animals in medical experiments, 199
Aluminium chlorohydroxide: sweat, 32
Amino acid treatment: desensitization; *Evernia prunastri*; Oakmoss absolute, 121
Animals in medical experiments: alternative testing and safety assessment; Shakespeare, 199
Bilayer formation: rough skin; regulation; pH; enzyme; stratum corneum; lamellar granules; extra-cellular; glycosidase; sphingomyelinase; esterase; protease, 47
Cigarettes: smoking; skin lipids; skin moisture; 83
Cocoa shell butter; fibroblasts growth; non-saponifiable, 39
Consumer protection: preservatives; quality assessment; viruses; cosmetics, 235
Cosmetic products: TLC; HPLC; octyl triazone; sunscreens, 113
Cosmetics: consumer protection; preservatives; quality assessment; viruses, 235
Cultured keratinocytes: fibroblasts; skin cells; *in vitro* skin toxicity tests, 245
D values: fungi; preservative efficacy; solid cosmetics, 163
Desensitization: *Evernia prunastri*; Oakmoss absolute; amino acid treatment, 121
Enzyme: stratum corneum; lamellar granules; extra-cellular; glycosidase; sphingomyelinase; esterase; protease; bilayer formation; rough skin; regulation; pH, 47
Esterase: protease; bilayer formation; rough skin; regulation; pH; enzyme; stratum corneum; lamellar granules; extra-cellular; glycosidase; sphingomyelinase, 47
Ethylcellulose: vegetable oils; oleogels, 228
***Evernia prunastri*:** Oakmoss abolsute; amino acid treatment; desensitization, 121
Extra-cellular: glycosidase; sphingomyelinase; esterase; protease; bilayer formation; rough skin; regulation; pH; enzyme; stratum corneum; lamellar granules, 47
Fibroblasts: skin cells; *in vitro* skin toxicity tests; cultured keratinocytes, 245
Fibroblasts growth: non-saponifiable; cocoa shell butter, 39
Fungi: preservative efficacy; solid cosmetics; D values, 163
Glycosidase: sphingomyelinase; esterase; protease; bilayer formation; rough skin; regulatyion; pH; enzyme; stratun corneum; lamellar granules; extra-cellular, 47
Guinea pig skin, percutaneous absorption; skin drug retention; penetration enhancers; mouse skin, 153
Hairdressing exposure: lung reactions; vapours; measurement methods; paraphenylenediamine, 19
HPLC: octyl triazone; sunscreens; cosmetic products; TLC, 113
Human: pigmentation; lightening effect; hydro-quinine; mouse, 173
Humectants: phase diagrams; transparent gels; active ingredients solubilization; vitamins; sunscreen oxidants, 183
Hydroquinine: mouse; human; pigmentation; lightening effect, 173
***In vitro* skin toxicity tests:** cultured keratonocytes; fibroblasts; skin cells, 245
In-use properties: syndet bars; tolerability; sodium cocyl isethionate; disodium lauryl; sulfosuccinate; wheat starch, 277
Lamellar granules: extra-cellular; glycosidase; sphingomyelinase; esterase; protease; bilayer formation; rough skin; regulation; pH; enzyme; stratum corneum, 47
Lightening effect: hydroquinine; mouse; human; pigmentation, 173
Liposomes: multiple emulsions; microemulsions, 93
Liposomes: surfactants; saturation; solubilization, 131
Lung reactions: vapours; measurement methods; paraphenylendiamine; hairdressing exposure, 19
Mathematical modelling: percutaneous penetration; sunscreens; ultra-violet filters, 265
Measurement methods: paraphenylendiamine; hairdressing exposure; lung reactions; vapours, 19
Microemulsions: liposomes; multiple emulsions, 93
Mouse: human; pigmentation; lightening effect; hydroquinine, 173
Mouse skin: guinea pig skin; percutaneous absorption; skin drug retention; penetration enhancers, 153
Multiple emulsions: microemulsions; liposomes, 93
Non-saponifiable: cocoa shell butter; fibroblasts growth, 39
Oakmoss absolute: amino acid treatment; desensitization; *Evernia prunastri*, 121
Octyl triazone: sunscreens; cosmetic products; TLC; HPLC, 113
Oleogels: ethylcellulose; vegetable oils, 228
Paraphenylendiamine: hairdressing exposure; lung reactions; vapours; measurement methods, 19
Penetration enhancers: mouse skin; guinea pig skin; percutaneous absorption; skin drug retention, 153
Percutaneous absorption: three-phase emulsions; perfluoropolymethylisopropylether, 65

Percutaneous absorption: skin drug retention; penetration enhancers; mouse skin; guinea pig skin, 153
Percutaneous penetration: sunscreens; ultra-violet filters; mathematical modelling, 265
Perfluoropolymethylisopropylether: percutaneous absorption; three-phase emulsions, 65
pH: enzyme; stratum corneum; lamellar granules; extra-cellular; glycosidase; sphingomyelinase; esterase; protease; bilayer formation; rough skin; regulation, 47
Phase diagrams: transparent gels; active ingredients solubilization; vitamins; sunscreen oxidants; humectants, 183
Pigmentation: lightening effect; hydroquinine; mouse; human, 173
Preservative efficacy: solid cosmetics; D values; fungi, 163
Preservatives: quality assessment; viruses; cosmetics; consumer protection, 235
Protease: bilayer formation; rough skin; regulation; pH; enzyme; stratum corneum; lamellar granules; extra-cellular; glycosidase; sphingomyelinase; esterase, 47
Quality assessment: viruses; cosmetics; consumer preservatives, 235
Regulation: pH; enzyme; stratum corneum; lamellar granules; extra-cellular; glycosidase; sphingomyelinase; esterase; protease; bilayer formation; rough skin, 47
Rough skin: regulation; pH; enzyme; stratum corneum; lamellar granules; extra-cellular; glycosidase; sphingomyelinase; esterase; protease; bilayer formation, 47
Saturation: solubilization; liposomes; surfactants, 131
Sensory analysis: talc, 75
Shakespeare: animals in medical experiments; alternative testing and safety assessment, 199
Skin cells: *in vitro* skin toxicity tests; cultured keratinocytes; fibroblasts, 245
Skin drug retention: penetration enhancers; mouse skin; guinea pig skin; percutaneous absorption, 153
Skin lipids: skin moisture; cigarettes; smoking, 83
Skin moisture: cigarettes; smoking; skin lipids, 83
Smoking: skin lipids; skin moisture; cigarettes, 83
Solid cosmetics: D values; fungi; preservative efficacy, 163
Solubilization: liposomes; surfactants; saturation, 131
Sphingomyelinase: esterase; protease; bilayer formation; rough skin; regulation; pH; enzyme; stratum corneum; lamellar granules; extra-cellular; glycosidase, 47
Stratum corneum: lamellar granules; extra-cellular; glycosidase; sphingomyelinase; esterase; protease; bilayer formation; rough skin; regulation; pH; enzyme, 47
Sunscreen oxidants: humectants; phase diagrams; transparent gels; active ingredients solubilization; vitamins, 183
Sunscreens: cosmetic products; TLC; HPLC; octyl triazone, 113
Sunscreens: ultra-violet filters; mathematical modelling; percutaneous penetration, 265
Surfactants: saturation; solubilization; liposomes, 131
Sweat: aluminium chlorohydroxide, 32
Talc: sensory analysis, 75
Three-phase emulsions: perfluoropolymethyl-isopropylether; percutaneous absorption, 65
TLC: HPLC; octyl triazone; sunscreens; cosmetic products, 113
Transparent gels: active ingredients solubilization; vitamins; sunscreen oxidants; humectants; phase diagrams, 183
Ultra-violet filters: mathematical modelling; percutaneous penetration; sunscreens, 265
Vapours: measurement methods; paraphenyl-endiamine; hairdressing exposure; lung reactions, 19
Vegetable oils: oleogels; ethylcellulose, 228
Viruses: cosmetics; consumer protection; preservatives; quality assessment, 235
Vitamins: sunscreen oxidants; humectants; phase diagrams; transparent gels; active ingredients solubilization, 183
